

## Spread the love

If you are in the market to buy ImageFixer plugin, this review is for you. Make sure you read it before you buy it.

Watch the below video

A few weeks back, I had a quick discussion with Bobby the creator of this plugin and we agreed that I'm going to test his new product and give him my feedback.

The image hover overlay thingy caught my attention

As usual, I was a little skeptical

So I decided to take this plugin for a spin and see for myself if it actually works

After all, the internet is full of hyped up internet marketing products, so it's important that you put your money where the value is.

Sure enough, I did my test

## My test results and my experience

To my surprise, this plugin was a lot more than just your "regular wordpress plugins"!

I know I sound too hypey .. but it's really difficult not to express your admiration when it's due

What I liked about ImageFixer is that it's not only an Image Fixer (doh)\*

By image fixer I mean a wordpress version of Photoshop where you get to edit your images right on your wordpress website.\*

Ok, photoshop might be a stretch .. I'm allowed to say that because I happened to be a photographer.\*

But it also offers a unique technology that I haven't seen before!

You can lay your call to action buttons, videos and even opt-forms right on the top of your still images!

They appear when you hover your mouse .. which I thought was pretty cool!

At some point, it got a bit addictive by hovering on and off the images just to see the effect lol!

But it doesn't stop here, Bobby also included high converting editable templates that can help the user sell

He even included integration with PixaBay, morguefile and flicker so one will have access to virtually unlimited number of images to choose from!\*

Speaking of integration, the system integrates with at least the 3 top autoresponders; Aweber, GetResponse and Mailchimp.

This integration helps you create campaigns and get more opt-ins and leads. Me personally, I was curious if it's going to work so I did end up opting in ☐

## Sales Funnel and Price

ImageFixer starts @ \$17 and the upgrade to pro\* is \$37

After that, you can pickup the reseller license for only \$57

Finally, the membership OTO is for \$19.95 per month or \$197 per year

The membership includes templates added regularly.

All the above OTO's are optional. With the front end offer alone you can do a lot already but if you like, the upgrades are nice addition to it.

## What's missing and Bonuses

Upon examination, I found that while PixaBay and MorgueFile are good, Flickr integration was not fixed by the time I was checking it out. I did report this issue to the vendor and he promised to get it fixed as he had some problems with the API, etc.

Nevertheless, since the image curation feature is only available in the pro version and the limitations of stock images, I decided to include 3 stock image bundles as bonuses if you decided to pick up ImageFixer through my link. If you think you need more, you can just shoot me an email and I will send you some more images. This completes the package for you right there.

The other missing ingredient in this product is how to actually drive traffic to your site, which is why I also included a video course specifically on getting free traffic to your website/offer.

I didn't just include the course itself, I actually included the reseller license, which means you can sell this product as your own and keep 100% of the profits.

This of business in a box bundle comes complete with sales page, thank you/download page and a bunch of other marketing materials.

I suggest that you sell each copy for at least \$9.95.

 **Download Instant Content Creator (1.5MB)**

 **Download Jack Jacker WP Plugin (0.41MB)**

## The verdict

Overall, I think it's a great solid product.

In my brief test, I haven't encountered any bugs or issues.

With the bonuses I'm offering, this is a good deal in my opinion.

This product gets my approval. I would invest in it for my own business so I do recommend it.

\* These features are in the Pro version only.
